Subject: Slides from AK/NY/NESCAUM/EPA Discussion on Wood Heater Certification 10.23.20

Good morning! Thank you and your staff for taking the time to meet with all of us last Thursday. We cleaned up the slides from last week's discussion on wood heater test certification and, as promised, put in suggestions for potential short, medium, and long term actions that we think EPA could take to improve the situation. As I noted on the call, Alaska is working through implementation of our state regulatory process for wood heaters that can be sold in Alaska's PM2.5 nonattainment area; we expect to be through our work to incorporate manufacturer comments/corrections on our summary report reviews by mid-November and those summaries will be available around that time. We want to continue the discussion and dialogue on this important issue once you all have had a little time to take a look at the information and issues raised. Thanks!

Alice
